SUMMARY

Aspiring Data Analyst seeking an entry-level position to apply analytical skills, SQL expertise, Python programming, and data visualization techniques to support data-driven decision-making and business insights.

EXPERIENCE

Data Analyst Intern | 3 Months

- Performed data cleaning, transformation, and validation using SQL and Python.
- Designed interactive dashboards and reports using Power BI and Excel.
- Wrote optimized SQL queries for data extraction, aggregation, and analysis.

PROJECTS

Predicting Credit Card Approvals

- Built a predictive model to analyze applicant data and automate credit card approval decisions using data preprocessing and machine learning techniques.

Supply Chain Management Dashboard (Power BI)

- Designed an end-to-end dashboard to track inventory levels, supplier performance, order fulfillment, and logistics KPIs.

Sales Dashboard (Power BI)

- Developed an interactive sales dashboard with KPIs, trend analysis, and slicers.

Retail Sales Analysis (SQL)

- Cleaned and analyzed retail sales data to identify revenue trends and top-performing products.

EDUCATION

KR Mangalam University, Gurugram — Master of Computer Applications (MCA) | 2025 – Present

Maharshi Dayanand University (MDU), Rohtak — Bachelor of Computer Applications (BCA) | 2025 | Percentage: 73.2%

CERTIFICATIONS

- Power BI Data Analyst Associate – Microsoft
- Data Analyst Certification – Simplilearn
- Data Science Certification – Simplilearn

SKILLS

Programming: Python (Pandas, NumPy, Matplotlib, Seaborn)

Databases: SQL, PostgreSQL

Visualization: Power BI, Excel

Tools: GitHub, Jupyter Notebook

Frontend: HTML, CSS, JavaScript
